EDUCATION

Osmania University	2024 - 2027
Bachelor of Engineering in Computer Science	CGPA: 9.4/10
Government Polytechnic College	2021 - 2024
Diploma in Computer Science	CGPA: 9.7/10

EXPERIENCE

Mobile Application Build Intern	Jun 2026 – Present IRA Labs
- Built cross-platform mobile application prototypes using AI-assisted development workflows - Integrated AI tooling into mobile build pipelines, reducing manual debugging time - Contributed to Android/iOS deployment processes including app store publishing requirements - Worked with Flutter and React Native frameworks across production-grade mobile codebases	

PROJECTS

PCOS Diagnostic & Personalized Wellness Platform Python XGBoost SMOTE FastAPI MongoDB Gemini API GitHub 	
- Developed an ML-powered PCOS risk prediction platform using XGBoost with 11 clinical and demographic features - Applied SMOTE to address class imbalance, achieving 96.7 - Built a FastAPI backend with MongoDB Atlas for real-time screening data storage and management - Integrated Gemini API to generate personalized diet and exercise recommendations based on user health metrics - Implemented Scikit-Learn preprocessing pipelines and deployed real-time inference using serialized ML models	
Women Safety App Java Android SDK Flask REST APIs GitHub 	
- Developed a voice-activated emergency system enabling hands-free SOS triggering using speech recognition - Implemented Android Foreground Service for continuous background monitoring even when the device is locked - Integrated real-time GPS tracking and automated SMS alerts with live location to emergency contacts - Built RESTful backend using Flask for user authentication and contact management - Designed offline-first architecture ensuring SOS functionality works without internet via cellular SMS	

SKILLS

Languages	Python, Java, JavaScript
Machine Learning	ML Fundamentals, Gradient Descent, Loss Functions, Bias-Variance Trade-off
Mathematics	Linear Algebra, Probability & Statistics, Calculus, Optimization Fundamentals
DSA	Arrays, Linked Lists, Trees, Graphs, Hashing, Complexity Analysis
Core Concepts	OOP, Operating Systems, Computer Networks
Frameworks	React.js, Next.js, Node.js, Express.js, Tailwind CSS
Databases	MySQL, MongoDB, PostgreSQL
Tools	Git, GitHub, REST APIs, VS Code, Figma

ACHIEVEMENTS

- Secured State Rank 11 in ECET (Engineering Common Entrance Test).

OPEN SOURCE CONTRIBUTIONS

- Redesigned the default **Service Agreement** sample in Accord Project's open-source Template Playground to better reflect a realistic legal use case ([PR #702](#))
- Fixed broken VS Code extension links in **Accord Project technical documentation**, improving developer onboarding experience ([PR #485](#))
