majojuvaishnavi@gmail.com [◇ LinkedIn](#) [◇ GitHub](#) [◇ Portfolio](#)

EDUCATION

Osmania University

Bachelor of Engineering in Computer Science

2024 - 2027

CGPA: 9.4/10

Government Polytechnic College

Diploma in Computer Science

2021 - 2024

CGPA: 9.7/10

EXPERIENCE

Mobile Application Build Intern

Jun 2026 - Present

IRA Labs

- Built cross-platform mobile application prototypes using AI-assisted development workflows with Expo and React Native.
- Contributed to Android and iOS application deployment workflows, including build generation, testing, and app store publishing requirements.

PROJECTS

Women Safety App | Java | Android SDK | Flask | REST APIs | [GitHub](#)

- Developed a voice-activated emergency SOS system with speech recognition and Android Foreground Service, triggering emergency alerts within an average of 3.2 seconds.
- Integrated real-time GPS tracking with automated SMS alerts to emergency contacts, including offline SOS support via cellular SMS without internet connectivity.
- Built a RESTful Flask backend for user authentication and emergency contact management.

Multi-Tenant SaaS Backend | Java | Spring Boot | Spring Security | Hibernate | PostgreSQL | [GitHub](#)

- Engineered a multi-tenant SaaS backend in Spring Boot with secure tenant data isolation via Hibernate, JWT authentication, and role-based access control (RBAC)
- Designed layered architecture with Flyway migrations, request validation, global exception handling, and Swagger documentation
- Implemented unit and integration tests with JUnit 5

PCOS Diagnostic & Personalized Wellness Platform | Python | MongoDB | Gemini API | [GitHub](#)

- Built an ML-powered PCOS risk prediction platform using XGBoost (11 features) with SMOTE for class imbalance, achieving 96.7
- Developed a FastAPI backend with MongoDB Atlas for real-time data storage and Gemini API integration for personalized diet/exercise recommendations
- Implemented Scikit-Learn preprocessing pipelines with serialized model inference

SKILLS

Languages C++, Java, Python, JavaScript

DSA Stacks, Queues, Trees, Graphs, Hashing, Complexity Analysis, Dynamic Programming

Core Concepts OOP, DBMS, Operating Systems, Computer Networks, System Design (Basics)

Frameworks Spring Boot, JUnit 5, REST APIs

Build Tools Maven, Git, GitHub

Databases MySQL, PostgreSQL, MongoDB

ACHIEVEMENTS

- Secured State Rank 11 in ECET (Engineering Common Entrance Test).

OPEN SOURCE CONTRIBUTIONS

- Redesigned the default **Service Agreement** sample in Accord Project's open-source Template Playground to better reflect a realistic legal use case ([PR #702](#))
- Fixed broken VS Code extension links in **Accord Project technical documentation**, improving developer onboarding experience ([PR #485](#))
